HPS
HEAD PROTECTION SYSTEM

Head Protection System

Un prodotto di qualità è il risultato della combinazione di molteplici elementi. Come il progetto HPS (acronimo di Head Protection System), nel quale GIVI ha riversato tutta l'esperienza acquisita nella lavorazione avanzata delle materie plastiche, la conoscenza di materiali specifici, una grande ricerca tecnica e nuove soluzioni stilistiche. La gamma caschi HPS di GIVI rispecchia pienamente le aspettative e le esigenze di chi vive abitualmente su due ruote l'attuale realtà urbana ed extraurbana.

A quality product is the result of combining its individual components produced to the highest quality. This occurred also for the HPS Project (abbreviation of Head Protection System), in which GIVI has conveyed its understanding/experience of advanced plastic technology, its knowledge of a wide range of specific materials, a deep technical research and new design solutions. The HPS range of helmets GIVI created fully satisfies the expectations and the needs of every rider living in the modern urban and suburban environment.
